I love exploring challenging problems and designing high quality software solutions. You'll find me to be a quick learner and eager to work with others.

EDUCATION

University of California San Diego

Computer Engineering Major

- 3.708 GPA
- Clubs: ACM

La Jolla, CA

Class of 2024

Los Gatos High School

- 4.4 GPA

Los Gatos, CA

Class of 2020

EXPERIENCE

Virtual Tech Camp Instructor

iD Tech

Los Gatos, CA

Summer 2021

- Coached a group of students with little to no experience on the basics of Javascript and game dev
- Designed a custom curriculum tailored towards the interests and skill level of my students

Software Intern

MagikVision

Los Gatos, CA

Summer 2019

- Used OpenCV tracking and number recognition to find frame loss in over 100 broken YouTube videos
- Implemented a binary search to identify where the errors in the video stream occurred and fix them
- Employed YouTube API to extract data about the videos as well as pulling frames for OpenCV analysis
- Created a progressive web app with custom controls for scrubbing through long sports recordings

Robotics Team Programming Lead

FRC Team 972: Iron Claw

Los Gatos, CA

September 2017 - June 2020

- Managed a 14 student programming team while working with other subteams to create requirements
- Trained more than 20 students in basic programming concepts and control systems design
- Used GitHub Project board and scrum daily standups to ensure smooth development and integration
- Wrote and tuned PID controllers to precisely control integral elements on competition-winning robots

PROJECTS

Discord Digest Bot

Python, MongoDB, Heroku

- Developed functions using mongoose to interface the discord bot with a MongoDB Atlas cluster
- Setup Heroku to host bot and automatically deploy new changes when code is pushed to GitHub

MagikVision Pitch Viewer

Javascript, PWA

- Utilized YouTube embeds to create a custom video player for viewing each pitch in a softball game
- Built a Node.js backend to pull data from MongoDB so it could be quickly and securely accessed

SKILLS

Languages: Java, Javascript, HTML, CSS, Bash, Python, C

Software: MongoDB, Nginx, Node.js, Git, Unix, OpenCV, Heroku, vim, PWA, Figma

Coursework: Basic Data Struct & OO Design, Software Tools & Techniques, Linear Algebra, Discrete Math
